

## Information

### Data Audit and Compliance v1.0

This application requires the Splunk Common Information Model. The Splunk CIM should be configured correctly and your data should be CIM compliant. The Splunk CIM data models should be accelerated.

*Please note: This app does not provide normalisation for any existing data or provides CIM compliance for anything you may already be indexing.*

For more information on the Splunk CIM please see:

App - <https://splunkbase.splunk.com/app/1621/>

Docs - <https://docs.splunk.com/Documentation/CIM/4.13.0/User/Overview>

Splunk Add-ons and CIM -

<https://docs.splunk.com/Documentation/AddOns/released/Overview/Add-onsandCIM>

*Please note: This app contains several scheduled searches. Dashboards may not populate immediately following installation.*

This application should be installed on Search Heads. It is not required on Splunk Indexers or Splunk Universal and Heavy Forwarders.

### Application Support Matrix

This application should be compatible with most versions of Splunk 7.x and Splunk 8.x.

Splunk Deployment	Supported/Not Supported	Note
Single Instance (AIO)	S	Install as per instructions below
Distributed Deployment	S	Install on search heads only
Indexer Cluster	S	Install on search heads only
Search Head Cluster	NS	Not tested, compatibility not guaranteed
Splunk Cloud	NS	v1.0 has not been vetted for Splunk Cloud

## App Installation

- 1) Download the Somerford Data Audit and Compliance Application by using the download link (above)
- 2) Install the application
  - a) Go to your Apps list in Splunk Web (top left) > Manage Apps > Install app from file, and then upload/install the application. A Splunk restart is not required.
  - b) Alternatively, you can also extract the .tgz package and move the “data\_audit\_and\_compliance\_app\_for\_splunk” folder into your \$SPLUNK\_HOME/etc/apps folder (Splunk restart required)
