

Women in Cybersecurity

Women in Tech Week with Zoe Mackenzie

WiCyS is an international non-profit membership organisation dedicated to bringing together and empowering women in cybersecurity from academia, research and industry.

WiCyS UK Affiliate, launched in January 2021, is continuing the mission and helping to build a strong CyberSecurity workforce with gender equality by facilitating the recruitment, retention and advancement of women in the field.

Zoe Mackenzie - Ambassador,
WiCyS UK

Whether you are a student, considering a career change, or an experienced professional wanting to advance her career, WiCyS offers continuous mentoring, recruitment opportunities, learning, networking, and career development to women at all stages of their cybersecurity careers. By collaborating with the UK CyberSecurity Community, leading employers, universities and thought leaders, we aim to make our affiliate the go-to resource for UK women in cybersecurity.

Zoe is an Ambassador at Women in Cyber Security (WiCyS) UK and has been working in the technology and cyber security industry since 2013. She works as a Cyber Security Analyst delivering in-house technical expertise to her organisation. Alongside work, she has an interest in 'demystifying' cyber security by speaking on the subject at conferences and events, such as the Cloud and Cyber Security Expo at the Excel Centre in London.

Zoe is passionate about sponsoring women into the cyber security industry by providing 1:1 mentoring and support. Most recently taking up the position as Ambassador at WiCyS UK, she is excited to contribute towards a global network of professionals who are addressing and rebalancing diversity in the industry.
