# Full Job Description - Graduate Junior Consultant

## *About Sommerford Associates*

Sommerford Associates develops and delivers disruptive technology solutions that span infrastructure and cloud monitoring, identity, security, analytics, ITOps and DevOps. Founded in 2001, headquartered in Swindon with a branch office in Cirencester, we work with a range of 'best in class' solutions and our consultants build and integrate bespoke platforms that significantly reduce risks and drive productivity for our customers. We work with FTSE 100, FTSE 250 companies and the most secure departments of the Public Sector providing our customers with delivery support, including design, implementation and deployment.

At Sommerford we pride ourselves on the investment we provide in our employees through our in house on-going support, sales training and vendor / technology training . This ensures we provide a solid foundation for success.

## ***Why Somerset Associates?***

- Over 60 staff with approx. 50% of these being highly skilled consultants ensuring we provide greater value to our new and existing customers.
- The ability for remote working with schedule bi-weekly sales team meetings held in our office based in Cirencester.
- Winners of an array of industry awards.
- Excellent training and career prospects offered.

## ***Job Responsibilities***

Take up training to build a broad range of technical skills to become our next generation of technicians, system administrators, architects and engineers. Once trained you will become fully certified in leading edge technologies.

This role is ideal for anyone who has recently graduated from University looking for a role in industry who wants to train in leading edge technologies to become a certified engineer.

Training in our various solutions before going down a specialisation, leading you to become one of our wonderful suite of technicians, support desk engineers, or consultants.

---
